**BUTTER: Volume and Price Range in Purchases Under G.C.F. Program,
Period Ending June 30, 1942**

August 24, 1942

BUTTER

1. Total weekly purchases of butter under the G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart is for salted butter and shows the variation in accepted bids between firms adjusted to Chicago basis by deducting 1 1/2 cents from the f.o.b. price San Francisco and f.o.b. Seattle, 1 cent from f.o.b. price Portland and 3/4 cents from f.o.b. price New York. The volume of unsalted butter is included in the quantity of butter purchases and represents approximately 1.5 percent of the total volume. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for butter fat on July 15, 1942 was 37.4 cents per pound. Adjusted for seasonal variation and the July 1942 average farm price was 37.5 cents per pound.
4. Butter fat production.

<u>1940</u> <u>1941</u>		<u>January - June</u>		<u>Percent</u>
<u>Million Lbs.</u>		<u>1941 -</u>	<u>1942</u>	
		<u>Million Lbs.</u>		<u>Increase</u>
4,331	4,567	2,342	2,437	4.1

5. The estimated butter fat production for 1942 is 4,729 million pounds. (BAE unofficial.)

BUTTER

1. Total weekly purchases of butter under the U.D.P. program are shown in the accompanying table.
2. The price range shown in the attached chart is for salted butter and shows the variation in received bids between firms adjusted to Chicago basis by deducting 1 1/2 cents from the U.D.P. price for Wisconsin and 2 cts. for the U.D.P. price for New York. The volume of unsalted butter is included in the quantity of butter purchases and represents approximately 1.5 percent of the total volume. These have been taken from the current weekly records of purchases and may not in all instances include independent transactions.
3. Weekly price for butter for on July 12, 1942 was 37.4 cents per pound. Adjusted for seasonal variation and the July 1942 average farm price was 37.8 cents per pound.

4. Butter for production.

1940		1941 - 1942 Percent	
Million lbs.		Million lbs.	
4,381	6,387	2,342	4.1

5. The estimated butter for production for 1942 is 4,723 million pounds. (See footnote.)

AMERICAN CHEESE

1. Total purchases of American cheese under G.C.P. program are shown on accompanying table.
2. The price range shown in the attached Chart is for cheddars, (average weight about 75 pounds per cheese) and shows the variation in bids between firms in the base price area (Wisconsin, Illinois, Upper Michigan, Missouri, and points West). Recently ALA has been buying cheese 1/4 cent per pound over base (20-1/4 cents per pound) in Michigan proper, Indiana, Kentucky, and Ohio, and 3/4 cent per pound over base in Pennsylvania and New York. Small size cheese (Single Daisies and Flats) has been purchased at 1/4 cent per pound over the base price for large style cheese. In connection with this chart, it is significant to note that there has been no variation from the maximum base price within the basing point area since the policy of announcing maximum base point prices we would pay was adopted in February 1942.
3. Parity equivalent price for July 15, 1942 was 17.5 cents per pound at Wisconsin (Twins). (Estimated by Dairy and Poultry Branch.)
4. Production.

<u>1940</u>	<u>1941</u>	<u>January thru June</u>		<u>Percent</u>

DRY SKIM MILK - Roller and Spray

1. Total purchases of dry skim milk, roller and spray under G.O.P. program are shown on accompanying tables.
2. The price ranges shown in the attached charts are for dry skim milk, (in 150 or 200 pound barrels) and show the variation in bids between firms in the basing point price area (Ohio and States west and south). Since July 22, 1942, AMA has been buying roller skim milk at 11½ cents, and since July 22 spray skim milk at 14 cents in this area. Purchases have been made in Pennsylvania, New York, and other Northeastern States at an additional 1/4 cent per pound.
3. No parity price is used for dry skim milk.
4. Production of dry skim milk for human consumption.

	1940 (Thous. lbs.)	1941 (Thous. lbs.)	January through June		Percent Increase

DRY SKIM MILK, SPRAY: Volume and Price Range in Purchases under G.C.P. Program,
 Period Ending June 30, 1942

August 12, 1942

EVAPORATED MILK

1. Total purchases of evaporated milk under G.C.P. program are shown on accompanying table.
2. The price range shown in the attached Chart is for evaporated milk in solid fiber cases, (average weight of milk about 43.5 pounds per case) and shows the variations in bids between firms in the basing point price area (Ohio and States west and south). Since July 28, 1942 AKA has been buying evaporated milk at base prices of \$3.10 per strapped export case, \$3.07 per unstrapped export case, and \$3.00 for domestic corrugated cases. Corresponding prices in New York, Pennsylvania, and other Eastern States have been 10 cents per case additional. Most of the recent purchases have been in solid fiber export cases unstrapped.
3. Production.

<u>1940</u> <u>Million Cases</u>	<u>1941</u> <u>Million Cases</u>	<u>January thru June</u>		<u>Percent</u> <u>Increase</u>
		<u>1940</u> <u>Million Cases</u>	<u>1941</u> <u>Million Cases</u>	
56.6	78.6	35.6	49.7	43

4. 1942 estimated production is over 3 1/2 billion pounds (Dairy and Poultry Branch), or 80.5 million cases.

FROZEN EGG PRODUCTS

1. Total purchases of frozen egg products are shown on the accompanying table.
2. The price range shown on the attached chart is for frozen whole eggs and shows the variation in accepted bids between firms, adjusted to New York basis. The volume of frozen yolks is included in the quantity of frozen egg products and represents about 6 percent of such total quantity. The price of frozen egg yolks has been approximately 10 cents per pound more than frozen whole eggs.
3. Parity price for eggs on July 15, 1942 was 29.4 cents per dozen, adjusted for seasonal variation and the July 1942 average farm price was 29.5 cents per dozen.
4. Egg production.

FRESH SHELL EGGS

1. Total weekly purchases of fresh shell eggs under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart is for fresh shell eggs and shows the variation in accepted bids between firms f.o.b. origin. From the week ending April 29, 1941 through the week ending August 30, 1941 the range in price is for U. S. Wholesale Grade No. 1, Extras, purchased in the Midwestern area. From the week ending September 13, 1941 to February 28, 1942 the price range is for U. S. Export Grade No. 3, eggs purchased in the Midwestern area. From February 28, 1942 through the week ending March 28, 1942 the range in price for U. S. Wholesale Grade No. 1, Extras, purchased in the Midwestern area. From March 4, 1942 to July 1, 1942 purchases were made only in the Southern area and the price range shows the variation in accepted bids between firms for U. S. Wholesale Grade No. 1, Extras, f.o.b. origin. There were no purchases of a given grade of eggs through the entire period.
3. Parity price for eggs on July 15, 1942 was 29.4 cents per dozen adjusted for seasonal variation and the July 1942 average farm price was 29.5 cents per dozen.
4. Egg production.

CANNED CHOPPED HAM

1. Total weekly purchases of canned chopped ham under G.C.P. program are shown on the accompanying tables.
2. The price ranges shown in the attached charts are for canned chopped ham in 6-pound, 2-1/2 pound, and 12-ounce cans and shows the variation in bids between firms adjusted from point of origin to Chicago basis. On July 23, 1942, the Secretary of Agriculture announced that AMA will purchase canned chopped ham on the following schedule of maximum prices and size of cans:

<u>Size of Can</u>	<u>Maximum Price</u> Cents per pound
12-ounce	42.00
2-1/2 pound	39.25
6 pound	38.00

These maximum prices approximate the top prices AMA paid during January and February 1942. Since that time, AMA had been paying weekly top prices for canned chopped ham as follows:

<u>Size of Can</u>	<u>Price Range</u> (Weekly highs) Cents per pound
12-ounce	43.00 - 43.50
2-1/2 pound	40.25 - 40.75
6 pound	39.00 - 39.50

These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.

3. Parity price for hogs on July 15, 1942, was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog Production

	<u>1940</u>	<u>1941</u>	<u>January - June</u> <u>1942</u>
	(1,000 head)	(1,000 head)	(1,000 head)
Pigs saved	79,840	85,035	61,976
Federal inspected slaughter	50,398	46,520	26,927
Total slaughter	77,610	71,403	

1942 estimated total pig crop is 105 million head. The expected total slaughter is 88 million head. (BAE unofficial)

Source: Basic Data, Purchase Branch, AMA.

Prepared by Program Appraisal Division, AMA.

1. The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is of great importance in the theory of the structure of the atom.

2. In the second part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

3. In the third part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

4. In the fourth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

5. In the fifth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

6. In the sixth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

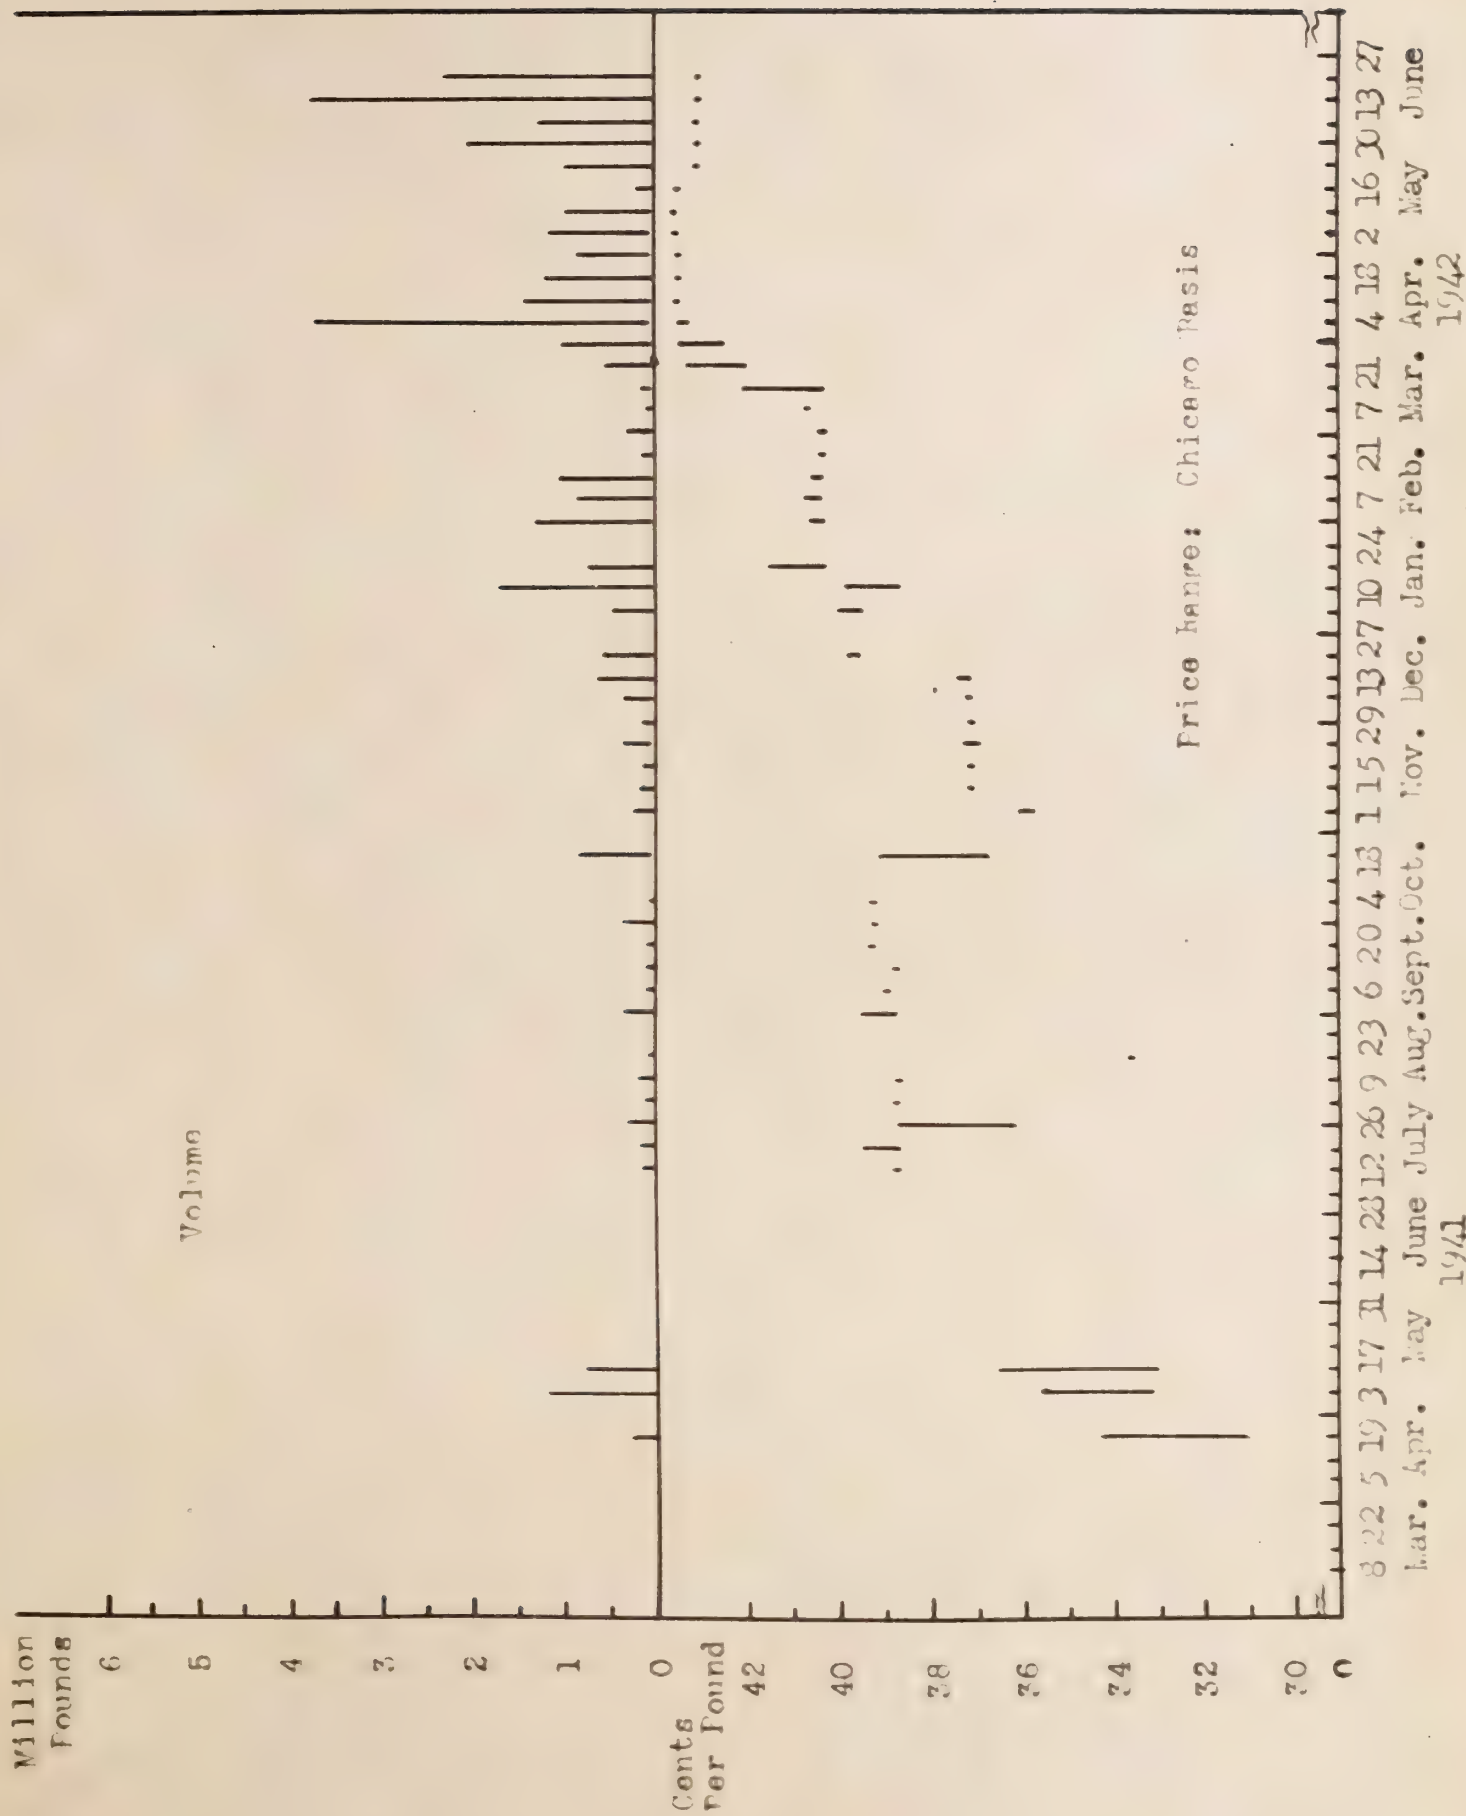

7. In the seventh part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

8. In the eighth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

9. In the ninth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

10. In the tenth part of the paper, the author discusses the results of his calculations. It is shown that the results are in good agreement with the experimental data.

CANNEL CLOTTED HAI (12-oz. cans): Volume and Price Range in Purchases Under G.C.I. Program,
Period Ending June 30, 1942

August 17, 1942

CANNED CORNED PORK

1. Total purchases of canned corned pork under G.C.P. program are shown on the accompanying table.
2. The price range shown on the attached chart is for corned pork in 6 pound cans and shows the variation in accepted bids between firms, adjusted from FOB point of origin to Chicago basis. The volume of canned corned pork in 12 ounce, 24 ounce and 2 1/2 pound cans is included in the total quantity of corned pork and represents about 6 percent of the total.

On July 23, 1942 the Secretary of Agriculture announced that ARA would purchase canned corned pork under the following schedule of maximum prices.

<u>Size of Can</u>	<u>Maximum price</u> Cents per Pound
12 ounce	59.25
6 pound	55.25

Since February 1, 1942, the top prices paid by ARA for canned corned pork in 6 pound cans ranges from 55.59 to 56.00 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments or contract adjustments.

3. Parity price for hogs on July 15, 1942 was \$11.05 per hundredweight. The July 1942 average farm price of hogs was \$13.76 per hundredweight.
4. Hog Production.

	<u>1940</u> (1,000 head)	<u>1941</u> (1,000 head)	<u>January - June</u> <u>1942</u> (1,000 head)
Pigs Saved	79,840	85,035	61,976
Federal Inspected Slaughter	50,398	46,520	26,927
Total Slaughter	77,610	71,403	

1942 estimated total pig crop is 105 million head. The expected total slaughter is 88 million head. (BAE unofficial)

CANNED PORK AND SOYA LINKS

1. Total weekly purchases of canned pork and soya links under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart shows the variation in bids between firms for canned pork and soya links on a Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AEA would purchase canned pork and soya links at a price not to exceed 30.75 cents per pound in 2 pound cans. Since April 4, 1942, AEA has been paying weekly top prices for canned pork and soya links ranging from 31.00 to 31.50 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average price of hogs was \$13.78 per hundredweight.
4. Hog production.

	<u>1940</u>	<u>1941</u>	<u>January - June</u> <u>1942</u>

CANNED PORK LUNCHEON MEAT

1. Total weekly purchases of canned pork luncheon meat under G.C.P. program are shown in the accompanying tables.
2. The price ranges shown in the attached charts are for canned pork luncheon meat and show the variation in bids between firms adjusted from point of origin to Chicago basis. On July 23, 1942, the Secretary of Agriculture announced that AMA would purchase canned pork luncheon meat at a price not to exceed the following schedule of can sizes and respective maximum prices.

<u>Size of Can</u>	<u>Maximum Price Cents per Pound</u>
12 ounce	40.50
2 $\frac{1}{2}$ pound	37.75
6 pound	36.50

These are approximately the maximum prices paid by AMA on March 15, 1942.

3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog production.

	<u>1940</u>	<u>1941</u>	<u>January - June 1942</u>
	(1,000 head)	(1,000 head)	(1,000 head)
Pigs Saved	79,840	85,035	61,976
Federal Inspected Slaughter	50,398	46,520	26,927
Total Slaughter	77,610	71,403	

5. 1942 estimated total pig crop is 105 million head. The expected total slaughter is 88 million head. (BAE unofficial)

CANNED SLICED BACON

1. Total purchases of canned sliced bacon are shown in the accompanying table.
2. The price range shown in the attached chart is for canned sliced bacon, 24 ounce cans, and shows the variation between bids between firms adjusted from point of origin to Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AMA would purchase canned sliced bacon in 24 ounce cans, at a price not to exceed 34.75 cents per pound Chicago basis. Since January 10, 1942 AMA has been paying weekly top prices for canned sliced bacon ranging from 35.15 to 36.50 cents per pound.

These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.

3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog production.

CANNED SLICED BACON: Volume and Price Range in Purchases under G.C.P. Program,
Period Ending June 30, 1942

August 12, 1942

PORK TONGUES

1. Total purchases of canned pork tongues under G.C.P. program are shown on the accompanying table.
2. The price range shown in the attached Chart is for canned pork tongues, 6 pound cans, and shows the variation in bids between firms adjusted from point of origin to Chicago basis. The volume of canned pork tongues in 12 ounce and 2 1/2 pound cans is included in the quantity shown on the attached table and represents approximately 500,000 pounds for the fiscal year 1941-42. On July 23, 1942 the Secretary of Agriculture announced that AIA will purchase canned pork tongues at a price not to exceed 36.5 cents per pound in 6 pound cans. This is approximately the price paid on February 1, 1942. Since that date AIA has been paying weekly top prices for canned pork tongues ranging from 36.57 to 37.25 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.05 per hundredweight and the July 1942 average farm price was \$13.78 per hundredweight.

4. Hog production.	<u>1940</u>	<u>1941</u>	<u>January-June</u>
	(1,000 head)	(1,000 head)	(1,000 head)
Pigs Saved	79,840	85,035	61,976
Federal Inspected Slaughter	50,398	46,520	26,927
Total Slaughter	77,610	71,403	

5. 1942 estimated total pig crop is 105 million head and the expected total slaughter is 88 million head (BAE unofficial)

HAMS, SWEET PICKLED REGULAR

1. Total purchases of sweet pickled regular hams under G.C.P. program are shown on the accompanying table.
2. The price range shown on the attached chart is for sweet pickled regular hams and shows the variation between bids accepted between firms adjusted to Chicago basis. From 4/5/41 through 7/5/41 the total volume purchased as shown on the chart and table includes frozen regular hams. On July 23, 1942 the Secretary of Agriculture announced that AMA would purchase sweet pickled regular hams under the following schedule of weights and respective maximum prices:

<u>Weight range</u>	<u>Maximum price</u>
Pounds	Cents per Pound
8 - 10	26.50
10 - 12	26.50
12 - 14	26.25
14 - 16	25.50
16 - 18	25.00
18 - 20	25.00

Since April 1, 1942, the weekly top prices paid by AMA for sweet pickled regular hams has ranged from 27.50 to 33.25 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.

3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog Production.

WILTSHIRE SIDES

1. Total weekly purchases of Wiltshire sides under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart shows the variation in bids between firms for Wiltshire sides on a Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AMA would purchase Wiltshire sides at a price not to exceed 22 cents per pound. Since November 7, 1942 AMA has been paying weekly top prices for Wiltshire sides ranging from 22.75 to 23.50 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. the July 1942 average farm price of hogs was \$13.78 per hundred-weight.
4. Hog production.

BELLIES - SALTED AMERICAN CLEAR CUT

1. Total weekly purchases of salted American clear cut bellies under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart shows the variation in bids between firms for salted American clear cut bellies on a Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AIA would purchase these bellies at a price not to exceed 15.75 cents per pound for bellies ranging between 18 and 40 pounds and not to exceed 15.25 cents per pound for bellies over 40 pounds. Since Mar 7, 1942 AIA has paid weekly top prices ranging from 16.25 to 17.25 cents per pound for salted American clear cut bellies. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog production.

FRESH FROZEN PORK LOINS

1. Total purchases of frozen pork loins under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart is for frozen pork loins and shows the variation in accepted bids between firms adjusted to Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AIA would purchase frozen pork loins at a maximum price per pound, Chicago basis on the following schedule of weight range.

<u>Weight range</u> Pounds	<u>Maximum Price</u> Cents per pound
6 - 8	28.25
8 - 10	28.25
10 - 12	28.25
12 - 15	26.75

Since March 4, 1942 AIA has been paying weekly top prices for pork loins of 28.50 cents per pound. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.

3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog Production.

PORK LOINS, FRESH FROZEN; Volume and Price range in Purchases under G.C.P. Program,
 Period Ending June 30, 1942

**SALT FAT BACKS: Volume and Price Range in Purchases Under G.C.P. Program,
Period Ending June 30, 1942**

**SHORT CLEAR BACKS: Volume and Price Range in Purchases Under G.C.P. Program
Period Ending June 30, 1942**

September 1, 1942

SALTED SHORT CLEAR BACKS

1. Total purchases of salted short clear backs under G.C.P. program are shown in the attached table.
2. The price range shown in the attached chart shows the variation in bids between firms adjusted to Chicago basis. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog production.

	<u>1940</u>	<u>1941</u>	<u>January - June</u> <u>1942</u>
	(1,000 head)	(1,000 head)	(1,000 head)
Pigs Saved	79,840	85,035	61,976
Federal Inspected Slaughter	50,398	46,520	26,927
Total Slaughter	77,610	71,403	

5. 1942 estimated total pig crop is 105 million head. The expected total slaughter is 88 million head. (BAE unofficial)

1. The first part of the report
describes the general situation
of the country and the
state of the economy.
It also mentions the
main problems which
the government is facing.
The second part of the
report deals with the
social and cultural
aspects of the country.
It discusses the
education system, the
health services, and the
cultural heritage of the
country.

The third part of the
report is devoted to the
environmental situation.
It describes the natural
resources of the country
and the impact of human
activities on the
environment. It also
mentions the measures
which the government is
taking to protect the
environment and to
improve the quality of
the environment.

SALT FAT BACKS

1. Total purchases of salt fat backs under G.C.P. program are shown in the attached table.
2. The price range shown in the attached chart shows the variation in accepted bids between firms adjusted to Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AMA would purchase salt fat backs at a price not to exceed the following schedule of weights and respective maximum prices:

<u>Weight range</u> Pounds	<u>Maximum price</u> Cents per pound
6 - 8	11.25
8 - 10	11.50
10 - 12	11.875
12 - 14	12.00
14 - 16	12.125
16 - 18	12.25
18 - 20	12.37
20 - 25	12.50

Since April 1, 1942 AMA has been paying weekly top prices for salt fat backs ranging from 13.375 to 14.00 cents per pound without regard to specified weights. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.

3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.
4. Hog production.

BEEF BUNGS

1. Total purchases of beef bungs under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart shows the variation in accepted bids between firms adjusted to Chicago basis. The weekly top prices paid by AMA for beef bungs has been 14 cents per bung since October 9, 1942. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for cattle on September 15, 1942 was \$8.24 per hundred-weight, compared to an actual farm price of \$11.17 per hundredweight.
4. Cattle Production. (Livestock Branch, AMA)

		<u>January - June</u>		<u>Percent</u>
	<u>1941</u>		<u>1942</u>	<u>Increase</u>
		<u>1,000 head</u>		<u>Percent</u>
Federally Inspected Slaughter	4,941		5,757	16.5

5. The estimated 1942 marketing for cattle and calves is 27.8 million head. Federally inspected slaughter is estimated at 12.6 million head of cattle and 5.7 million head of calves. Non-federally inspected slaughter is estimated at 5.7 million head of cattle and 3.8 million head of calves. (BAE unofficial)

TALLOW

1. Total purchases of tallow under G.C.P. program are shown in the accompanying table.
2. The price range shown in the attached chart shows the variation in accepted bids between firms adjusted from point of origin to Chicago basis. On July 23, 1942 the Secretary of Agriculture announced that AMA would purchase tallow at a price not to exceed 11.00 cents per pound Chicago basis. Since March 21, 1942 AMA has been paying weekly top prices of 11.00 cents per pound for tallow and prior to that date the top price was a fraction of a cent a pound under 11.00 cents. These data were taken from the current weekly records of purchases and may not in all instances include subsequent amendments.
3. Parity price for hogs on July 15, 1942 was \$11.03 per hundredweight. The July 1942 average farm price of hogs was \$13.78 per hundredweight.

SHOULDERS, PICNICS - NEW YORK AND SQUARE: Volume and Price Range in Purchases under
G.C.P. Program, Period Ending June 30, 1942

August 12, 1942

LARD

1. Total purchases of refined lard under G.C.P. program are shown on accompanying table. These purchases are all federally inspected.
2. The price range shown in the attached Chart is for refined lard, packaged in 56-pound wooden boxes. As there is no central purchasing area for lard, the price range shown represents the variation in bids between firms in different areas, converted to a Chicago F.O.B. basis. Since the third week in July 1942, AMA price policy prevents purchases of refined lard at a price above \$13.25 per hundred pounds on a Chicago basis, and steam lard or rendered pork fat, in tierces, (approximately 370 pounds) above \$12.90 per hundred pounds.

3. There is no parity price for lard.

4. Production 1/.

	<u>1940</u>	<u>1941</u>	<u>January thru June</u>		<u>Percent Increase</u>
	<u>Million Pounds</u>	<u>Million Pounds</u>	<u>1940</u>	<u>1941</u>	
Federally inspected	1,527	1,526	768	877	14
Non-federally inspected	769	724	?	?	

5. 1942 estimated production is 2,900,000,000 pounds of which 2 billion pounds are commercial lard, and 900 million pounds are farm production, not federally inspected. (Livestock, Meats and Wool Branch)

1/ Production of lard does not respond readily to changes in the price of lard, but is determined primarily by the number and average live weight of hogs marketed.

CANNED FISH

1. Weekly purchases of salmon by varieties (red, medium red and pink), California pilchards, Maine sardines, and Miscellaneous canned fish (herring, mackerel and flaked fish) under C.C.F. program, are shown in the accompanying tables.
2. The price ranges shown in the attached charts represent the variation in accepted bids between firms, and are shown as follows:

<u>Kind</u>	<u>Price used</u>
Salmon	No. 1 tall (approx. \$1.00 lower than ovals)
California pilchards	No. 1 tall (price ceilings less 7 percent)
Maine sardines	All sizes
Miscellaneous	No representative price <u>1/</u>

As shown in the AMA press release of September 16, 1942, AMA will purchase pilchards at price ceilings, less 7 percent for sales cost.

3. There is no parity price for fish.
4. Estimated production: 2/

	<u>1941</u>	<u>1942</u>	<u>Decrease</u>
	--- million cases ---		percent
Salmon	7.8	5.7	26.9
California pilchards	5.0	4.0-5.0	0 to 20.0
Maine sardines	3.0	3.0	0

These cases contain 48 - 1 pound cans except Maine sardine cases, which contain 100 - 3 1/4 ounce cans.

5. The AMA has requested from the fish industry a minimum of 60 percent of the salmon pack, 67 percent of the Maine sardines, and 66 to 83 percent of the pilchard pack. 3/

-
- 1/ Due to the heterogeneity of the data shown for the miscellaneous group, no attempt is made to show a representative price.
 - 2/ From Livestock Branch, AMA.
 - 3/ Based on U.S.D.A. Press Release, September 16, 1942

CANNED TOMATOES

1. Total purchases of canned tomatoes under G.C.P. program are shown by size cans in the accompanying tables.
2. The price ranges shown in the attached charts represent the variations in accepted bids between firms on a FOB origin or shipping point basis.

On July 25, 1942 the Secretary of Agriculture announced a price support program for 10 canned vegetables including tomatoes. Under this program the price paid by AMA to an individual vendor for canned tomatoes will not exceed 95 percent of the area average maximum price to canners for the appropriate grade and can size.

3. Parity price for tomatoes (for processing) on July 15, 1942 was \$14.23 per ton and the average price received by farmers for the 1941-42 season was \$15.21 per ton (BAE).
4. Production of tomatoes for processing.

<u>1940</u> <u>tons</u>	<u>1941</u> <u>tons</u>	<u>1942</u> <u>tons</u>	<u>1942 Increase</u> <u>Over 1941</u> <u>Percent</u>
2,275,800	2,802,500	3,346,500	19.4

5. 1942 estimated total production of tomatoes for processing is 3,346,500 tons (Fruit and Vegetable Branch (AMA) estimate).

DRIED PEAS

1. Total purchases of dried peas are shown by grades on the accompanying tables.
2. The price ranges shown in the attached charts are kept separate for U.S. No. 1, U.S. No. 2, 10% Bleach, and Split No. 1 and No. 2 combined. Effective August 1, 1942, under a price support program, the AAA started buying on an offer and acceptance basis in quantities necessary to support the market at a price level of \$5.25 per hundred pounds for U.S. No. 1 grade and \$5.00 per hundred pounds for U.S. No. 2 grade, in bags, carlots, f.o.b. cars at country shipping points. Purchases under the 1942 program will be made largely in Washington, Idaho, Colorado, Oregon, Montana, Wisconsin and Michigan. Since February 1942 most purchases were made in the Palouse Area of Washington and Idaho at a price range of \$4.90 to \$5.15 per hundred pounds. U.S. No. 2 prices were usually 25 cents under U.S. No. 1 prices.
3. A price comparable to parity for dry field peas was \$3.15 per hundred pounds on July 15, 1942 (Agricultural Prices, EAE, July 29, 1942).
4. Production of Peas, Dry Field.

<u>1940</u>	<u>1941</u>	<u>Indicated July 1, 1942</u>	<u>Percent Increase</u>
<u>Thousand Bags</u>		<u>Thousand Bags</u>	<u>over 1941</u>
3,439	3,798	6,055	60

5. 1942 estimated production is 6,055,000 bags of 100 pounds each (uncleaned) as indicated by the General Crop Report of July 1, 1942.

 DRIED PEAS - SPLIT, U.S. No. 1; Volume and Price Range in Purchases under GCP Program,
 Period ending June 30, 1942

August 31, 1942

DRIED BEANS

1. Total purchases of U.S. No. 1 and U.S. No. 2 under G.C.P. program are shown by varieties in the accompanying tables. Purchases are shown separately for Pea beans, Pinto, Great Northern, Red Kidney, and California Small Whites and Pinks.
2. The price ranges shown in the attached charts represent the variation in accepted bids between firms on a FOB origin or shipping point basis. This price basis is used because there is no important central market for all types of dry edible beans. Lend-Lease shipments, formerly made from the Eastern seaboard, are now also being made from the Pacific and Gulf ports.

The purchases by varieties were made according to the following schedule:

Variety	Purchases through June 1942		U. S. No.2 Price Spread		Location
	U.S. No. 1	U.S. No. 2	Below U. S. No. 1		
	100 lb. bags		Cents per bag		
Pea	712,677	1,343,762	thru 12/6/41	10	Michigan
			thru 6/30/42	15	
Pinto	455,686	334,792	thru 12/6/41	10	Southwestern
			thru 6/30/42	15	
Great Northern	369,650	380,300	thru 12/6/41	10	Montana and Idaho
			thru 6/30/42	15	
Red Kidneys	27,600	1,240		15	New York
California Small Whites	60,382	72,619	thru 6/21/41	10	California
			thru 6/30/42	15	
California Pinks	41,502	59,000		10	California

- 3/ Parity price for dry edible beans on July 15, 1942 was \$5.12, and the average farm price for July was \$4.49 per 100 pounds.

4. Dry edible bean production.

<u>1940</u>	<u>1941</u>	<u>1942</u>	<u>Percent Increase</u>
100 lb. bags			<u>over 1941</u>
16,943	18,788	20,596	9.6

5. The estimated production for 1942 is 20,596 bags of 100 pounds each, as indicated by August 1. General Crop Report. (BAE)
